Dear Sole Source Imports, Inc -

I've had a painful heel spur for years and has gotten so bad I could barely WALK. My husband purchased several different items from stores to catalogs - only to be dissappointed. I even went to a "specialist" who x-rayed my foot to only confirm that indeed I do have a heel spur. Because I have varicose veins and how the spur is located, I am not a candidate for surgery at all. Depressed and in pain, my wonderful Aunt in Florida send me info she copied off her computer stating your product is virtually GUARANTEED! I laughed and told my husband "no - it won't work." I'll just limp and be in pain forever (I'm only 53) A few days later, he gave me the heel seats. I read the info. + put them in my work sneakers. I'm a care-giver and spend ALOT of time on my feet. My feet and legs have never felt so wonderful. How can such a little, simple device that is so reasonably priced be such a Godsend! I love them and ordered another pair for my house shoes as going barefoot is NOT good. I hate to take my shoes off anymore. Where have you people been? Thank you, thank you, Thank you.

Sincerely, Billie Jammell
